

FIREBOLT

QUICK START GUIDE

A HERITAGE OF INNOVATION

You put your blood, sweat and tears into everything you do. Elgin products are made with that mantra in mind and more importantly, they are made for you.

We create tools that amplify the output of the everyday craftsman—the unapologetic, under-appreciated working class responsible for laying the brick & mortar of America. We believe there is no audience more inspiring or deserving to serve than this one, and it's our responsibility to enhance their workday with thoughtfully crafted products that combine cutting-edge tech with rugged & familiar designs.

Thank you for using the Elgin Firebolt Inspection Flashlight.

INGRESS PROTECTION

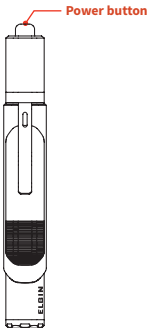

Your Elgin Firebolt features an IP66 rated enclosure that protects against dust, sweat and water. The Firebolt is not designed for prolonged submersion in water. In case of submersion in water, quickly remove from water and air dry before use.

**USING THE
FIREBOLT**

ACTIVATING THE LED LIGHT

Press the power button once to activate the light. Press the power button again to deactivate the light.

BATTERY REPLACEMENT

The Firebolt is powered by two AAA batteries. To replace the batteries:

Rotate the end cap 60 degrees counterclockwise and remove it from the Firebolt.

Slide old batteries out and dispose of them according to local law.

Insert new batteries positive end first, into the Firebolt.

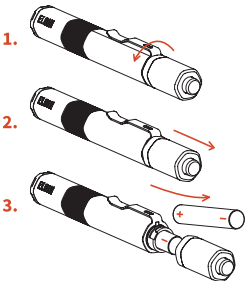

Replace end cap and gently tighten clockwise until secure.

WARNING:

Do not mix rechargeable and non-rechargeable batteries.

Do not mix batteries of different types/brands.

Do not mix old and new batteries.

CARE AND MAINTENANCE

To clean the Firebolt, use a damp cloth with or without mild soap to gently wipe away dust and dirt. Never use harsh or abrasive cloths or cleaners on any part of the Firebolt.
